

MAG 702-DC

Product Features

MAG 702-DC

- Mechanical and electrical integration : quickly assembly, easy maintenance.
- Molding production : high precision fast efficiency and guaranteed quality
- Worm-gear secondary variable speed transmission : motor wheel design, gate opening by manually when power off, no blocking, no oil leakage, large torque
- DC brushless motor design : low consumption, high efficiency, no overheat, wide speed adjustment.

Product Specification

Working Temperature	-45 °C~+85 °C
Main power supply	220VAC 50Hz
Motor power supply	24VDC
Open/Close Speed	1.5 - 6 sec.
Rate Power	140W
Motor Type	DC brushless motor
Humidity	≤ 90%
Remote control distance	≤ 100m.
Protection Grade	IP44
Motor No-load Speed	1850rpm.
Max Boom Length	3-6M
MTBF	5M
Certificate	ISO9001, CE, FC, RoHS
